Forecast for Friday 11 Feb 2022

Weather: Rather cloudy with a few showers in the early hours, but cloud breaking up by morning. Then a dry and mostly sunny start. Some cloud bubbling up during the day to bring the odd shower late afternoon and high cloud will increase from the west through the afternoon too. Cloud increasing and lowering in evening to bring some rain to western hills, though falling as snow on the tops.

Chance of cloud-free hill tops above 600m: 70% in early hours, otherwise 90%, but 40% late evening.

Low cloud and visibility: Mainly good visibility, but sometimes poor at height in early hours and again in late evening, with scattered sometimes broken cloud down to 500m, otherwise little in way of cloud below the tops.

Meteorologist's View

A cold start with ice in places and generally chilly on the slopes with some chill effect despite quite light winds, perhaps a significant chill late evening with summit snow and increasing winds.

Recent rainfall: measured at Neuadd: altitude 353m

Forecast for Saturday 12 Feb 2022

Weather: Cloud thickening overnight and rain spreading east, preceded briefly by snow on the tops. Then a dull and wet day, with heaviest and most persistent rain in west. Clearing to showers in evening and cloud becoming more broken.

Maximum wind: Southwest 25-35 gust 45, but 50 gust 65mph possible over the tops in the afternoon.

Chance of cloud-free hill tops 600m: 10-30%, with best chance in east

Low cloud and visibility: Moderate or poor, especially at height with cloud layers down to 500m, occasionally 400m, especially in west. Becoming mostly good below breaking cloud in evening.

Temperature: **Valleys:** Plus 3 C rising to plus 9 C.
At 600m: Plus 1 C in early hours, rising to plus 5 C by morning
Freezing level: Rising above the tops by morning.
